

DevOps and Provisioning Automation

Customer: A business consulting and technology integration services firm

Problem Statement

A business consulting and technology integration services firm responding with agile solutions to the challenges of regulated industries. Partnering with IntelliNotion, the customer is building a multi-tenant SaaS based application on Azure.

Proposed Solution

Powerupcloud helped deploy multiple flavors of the application in Azure App Services, Azure Container Service, Azure IaaS for developers, testers and end customers using end to end automated provisioning scripts.

Cloud Platform

Microsoft Azure.

Technologies used

Azure App Service, Azure IaaS, Automation Runbooks, DocumentDB, Azure Backup Services, Azure OMS, Azure CLI, Powershell, OrientDB, Nodejs, Nginx.
